

Patient Instructions to Use Celluma:

1. Clean the intended treatment area well with cleanser and water, rinse and dry.
2. Press the yellow on-off button on the Celluma control disc.
3. Press the Mode button until there is a light next to the desired mode.
(Note: if the light is already next to the desired mode, no pressing of the button is needed.)
4. Press the Start button
5. Place the eyeshields over your eyes after laying down comfortably.
6. Place the Celluma device over the cleaned, dried, intended treatment area. The closer to the skin, the better. You may GENTLY bend it to conform (within reason!) to the treatment area.
7. Relax! Sleep or meditate or listen to music or a podcast. The Celluma device will turn off automatically after 30 minutes.
8. After the treatment, please alert one of the staff so that the device's treatment surface can be cleaned with a microfiber cloth and dilute dishwash liquid, then rinsed and dried carefully to avoid scratches, so it is ready for the next person's treatment.
9. For wrinkle improvement, most see improvement 2-3 months after 8-12 treatments received at a rate of 2-3 treatments per week. Better results occur with more treatments. The results do not "wear off," but you will continue to age at the same rate as you did before Celluma treatment.
